

Comtex Web Topics Powered by Northern Light

STATISTICS

Daily Story Average:

- 40,000 web news stories per day
- Archive of 20 million news stories over 24 months

Comtex and Northern Light have partnered to create **Comtex Web Topics Powered by Northern Light**. This new product brings highly relevant and targeted web news to the Comtex platform, complementing our deep catalog of traditional newswire sources. Northern Light provides strategic research portals to global companies that combine licensed syndicated market intelligence, internally produced market research, social media, government databases, journals, and more.

Our new partnership allows us to provide not only 53 topic lists but also customized topics, which can be tailored to customer's specifications to support their projects, products and businesses. The web topic news can be received in the same format and alongside Comtex *CustomWires* and Full Feed products for a seamless blend of newswire and web news information.
